

Referral List of Architects with Child Care Facilities Development Experience in California

This document, *Referral List of Architects with Child Care Facilities Development Experience in California* © December 2004, was prepared by the Building Child Care (BCC) Project, a collaboration of organizations working together to provide a centralized clearinghouse of information and services designed to improve child care providers' access to financial resources for facilities development projects in California.

For more information about this document or about the BCC Project in general,
please call (888) 411-3535
or visit the project website at www.buildingchildcare.org.

DISCLAIMER:

The *Referral List of Architects* is provided to assist child care providers in facilities development and should not be used on its own in selecting an architect. Building Child Care does not endorse or claim to have personal knowledge of any of the architects listed. The *Referral List of Architects* is a work in progress and is not intended to be a complete list of architects with child care experience. The information provided in the *Referral List of Architects* was supplied by the architects listed.

I. ACKNOWLEDGEMENTS

This document, *The Referral List of Architects with Child Care Facilities Development Experience in California* ©2003, is a publication by the Building Child Care (BCC) Project, a statewide collaborative funded through the California Department of Education, Child Development Division. Nirmala Ramalingam, Coordinator of the BCC Project, conducted the research and development of this document.

The development of this document would not have been possible without the valuable assistance of the collaborative partners on the BCC Project: Jen Wohl of the National Economic Development and Law Center, Fran Kipnis of the California Child Care Resource and Referral Network, Claudia Siegman and Renu Nanda of the Child Care Facilities Fund of the Low Income Investment Fund, Marie Young of the ABCD Initiative of the Low Income Investment Fund, and Gary Kinley of the Child Development Policy Institute Education Fund.

Input from the following sources was key in helping us compile this information: BCC Advisory Committee members, Resource and Referral Agencies, Regional Resource Centers, Child Care Advocates, Local Investment in Child Care (LINCC) Project staff, City Child Care Coordinators, Local Planning Council Coordinators, and Dianne Philibosian and Gretchen Anderson of the Design Institute.

The development of this document was also dependent on the critical support of NEDLC staff members who helped in the process of preparing and distributing referral surveys.

The BCC is indebted to the child care providers across the state that sent in referrals of architects with whom they have worked in the past several years, and to the local California chapters of the American Institute of Architects (AIA) that many referrals. Also thanks to the architects themselves who took the time to give detailed information about their experience with child care facilities development projects.

Because this document will be updated regularly, please contact the BCC with additional referrals. Furthermore, if you listed in this resource, please feel free to be in touch with any edits you'd like to make to your listing.

If you have questions or comments about this document please email bcc@nedlc.org, or call the Building Child Care Project at the National Economic Development and Law Center, (888) 411-3535 or (510) 251-2600.

II. INTRODUCTION

The architect for a child care center will have a major impact on the design process, the project's development, and the project's total cost. An architect experienced in child care centers design will have a greater understanding of the specific needs and problems associated with a child care center, from the correct height of sinks for children, to licensing and code compliance. An experienced architect can improve the functioning and child-safety of a facility, and reduce the need for maintenance and future design changes.

This list is provided as a resource to assist child care providers in finding an experienced architect interested in working on child care facilities. BCC *does not endorse* or claim to have personal knowledge of any of the architects listed. The architects listed supplied all information regarding their experience. In addition to using this referral list, the BCC encourages you to contact other child care centers similar to yours for additional referrals.

The Architects List was compiled from three sources:

1. A survey to recently licensed Child Care Centers and Large Family Child Care Homes across the State requesting contact information of architects they recommended.
2. Architect contact information from local contacts in the child care field throughout California.
3. Architects who listed themselves with the American Institute of Architects (AIA) as having a "focus" on Child Care Facilities.

All architects listed were contacted directly before being included.

III. CHOOSING AN ARCHITECT

Request information from prospective architects on their firm, and their child care facilities experience. Ask for references of clients with projects similar to yours. Contact the references to see what their experience was. Interview more than one architect.

“How to Choose an Architect”

Written by Spaces for Children
<http://www.spacesforchildren.com/architec.html>

IV. QUESTIONS FOR THE ARCHITECT¹

The architect serves as the project designer and in some cases the Owner's agent during construction. Both roles are important. Choose an architect that can understand and enhance the Owner's design ideas, and who have skills preparing realistic cost estimates, obtaining permits, and supervising a general contractor.

The following is a list of topics and questions that will be helpful in conducting interviews with an architect. The list is not exhaustive, but should provide some basic principals. Please add and revise questions based on your project.

1. Overview of the Firm

- How did you get started?
- What kinds of projects have you specialized in?
- What is the background of your staff?
- How have you kept current in your practice?
- Do you have a valid California architect's license? What is your license number?
- Do you carry insurance? If so, what types? And what are the policy limits?

2. Child Care Projects Experience

- How many Child Care Projects have you been involved in?
- When and where were these projects located?
- May I see examples of projects similar to my project?
- May I have the contact information of the clients of these projects?
- What services did you provide for these clients during the design, bidding and construction phases?
- What problems did you run into on these projects? How did you resolve them?
- What was the actual cost vs. the budgeted cost of the projects?

¹ Influenced by "Questions for the Architect" Developed by Santa Cruz County Child Care Ventures, and "Consumer's Guide to Hiring an Architect" by the California Architects Board, www.cab.ca.gov/pdf/consumer2002.pdf pg. 5
Building Child Care
A California State Collaborative, December 2005

3. Services

- What services do you propose to provide for my project during the design, bidding and construction phases?
- Who will provide the services? You or your employees?

4. Experience Working in Particular Community

- Do you have experience in the community where the project is located?
- What will the permitting process be like for a project of this type?
- What experience do you have with Historic Buildings/Historic Districts (*if applicable*)?

5. The General Contractor

- What is the best way to select a general contractor?
- Is construction supervision typically part of your services provided?
- How do you keep the general contractor on budget and on time?

6. The Fee and Cost Estimates

- What will the fee schedule be?
- How will fees from my project be determined and what services do they cover?
- How accurate are your cost estimates?
- What other costs (permits, etc.) or services do you anticipate for my project?
- How do you ensure the project stays within the budget?
- If change is necessary to stay within budget, who will pay for the changes?
- How would additional charges for design changes, which I request, be computed?

V. GEOGRAPHIC DIVISIONS

•The Architects are listed by region, and by county within each region.

•Architects generally will work outside their county and many work on projects statewide.

•Generally, the larger the job, the further an Architect is willing to travel.

VIII. APPENDIX: ONLINE CHILD CARE DESIGN RESOURCES

Building Child Care

<http://www.buildingchildcare.org>

Information on facilities development and financing for child care providers. In addition to other services available through this site, child care providers can use it to identify useful community resources, financial resources, and publications that can help them in their efforts to build, purchase, expand, or renovate child care facilities in California.

National Clearinghouse for Educational Facilities: Early Childhood Centers

<http://www.edfacilities.org/rl/earlychildcenters.cfm>

(A resource list of links, books, and journal articles with extensive information on design guidelines, quality indicators and safety requirements for early childhood facilities)

National Resource Center for Health and Safety in Child Care <http://nrc.uchsc.edu/>

(National Safety Standards)

NRC's mission is to promote health and safety in out-of-home child care settings throughout the nation. They publish *Caring for Our Children: National Health and Safety Performance Standards Guidelines for Out-of-Home Child Care Programs*, Second Edition, available on-line, or for purchase.

Kaboom <http://www.kaboom.org/>

(Playground building resources, publications, and grants)

Non-profit organization that specializes in linking communities and corporations together to build much-needed, safe and accessible playgrounds, and has helped build more playgrounds than any other service organization

National Program for Playground Safety <http://www.uni.edu/playground/home.html>

(Playground safety resources)

NPPS acts as a national clearinghouse for playground safety information; conducts ongoing research in the area of injury prevention; produces educational videos addressing the roles of various audiences in injury prevention; and runs a national information hotline (800-554-PLAY) about playground injury prevention.

Spaces for Children <http://www.spacesforchildren.com/>

(Child care facilities experts)

Expertise encompasses the overall programming and design of child care buildings, including complete architectural services, furniture, and play structure design.

Design Childcare <http://www.designchildcare.com/>

(Child care planning and design services)

Consultants, Dr. Gretchen Anderson and Dr. Dianne Philibosian, have provided child care planning and design services, conducted research and advocacy, and created a professional education Institute.
